**OUR INTRODUCTIONS FOR 1951**

**“FOLLOW ME”**

**(M. Stevens) 36”, Mid-season to late.**

WE are indeed happy to offer our first introduction to the daylily world, and feel sure that “Follow Me” will be accepted with the rest of fine Hemerocallis on the market today. It represents years of work and study on our part and the beginning of a strand of daylilies that will take their place in the Hemerocallis of tomorrow as well as today.

FOLLOW ME, is a 6½ in. bloom of Swiss Rose in color with a mid-rib extending from the throat which is yellow green and running to a point in both sepal and petal; starting in the throat and extending out into the whole flower, gives the effect of a large star in the throat. The petals and sepals are slightly ruffled and recurved. We find it puts up strong scapes that stand erect. In Texas it starts to blooming in late June through July, in the east and north it would still bloom later. If you wish to check the color by chart. Plate 4, K-2 in Marez & Paul Color Chart. (Net) \$25.00.

**“SOUTHERN SUNSHINE”**

**(M. Stevens) 38”, Mid-season**

Southern Sunshine, is a large Tomato Red, that would be considered a self the red runs deep into the heart of the flower leaving a small yellow green throat. Petals are rather wide and ruffled and the sepals are not too wide but the cup of the flower holds together giving you a wide open bloom. The comments on this flower from our customers over the last few seasons decided that this would be our second introduction. Southern Sunshine is a 5½ in. bloom and is a good tomato color, you may check the color Plate 2, G-11 (Next to tangerine) in Marez & Paul color chart. (Net) \$7.50.
